## Bilisland Fuelwatch for Commercial & Construction

### Bilisland Fuelwatch Commercial & Construction

Run out of fuel? Guessing at how much heating oil you have left in your tank? Wondering when you should order and how much?

James D. Bilisland provides the simplest, most reliable and hassle-free way to ensure you always have plenty of heating oil in your tank.

We remotely monitor your tank using the most up-to-date, cutting-edge telemetric technology. We offer an accurate and effective way that takes away all these problems and many more by taking daily tank readings.

You can leave our friendly team to look after the readings and order for you. We offer access from your computer, laptop or mobile app for your phone so you can check your fuel levels and request an order when you're running low. Call us today and see how James D. Bilisland can help you manage your oil levels.

FUEL DISTRIBUTORS

Our monitoring service ensures a consistent supply, saving you time and the responsibility of physically checking the tank. We will monitor your tank level daily, advising when a top-up is required.

## How it works

We will arrange an installation of the monitoring device to your tank and our team will monitor the level of your tank notifying you when it reaches a certain agreed level.

**We aim to fill your tank at the most convenient time.**

## Benefits of using the Bilisland Fuelwatch for Commercial & Construction use:

- No downtime, as you will always have plenty of fuel
- Consistent usage reports in percentages
- You will be alerted when you are running low on fuel

## Bilisland Fuelwatch supports a wide range of our products:

- Kerosene
- Gas Oil
- Road Diesel/Derv
- HVO

Installation subject to sufficient strength mobile reception.
